Community Redevelopment Agency

Background Information:

The Center for Smart Streetscapes (CS3) is a National Science Foundation (NSF) Engineering Research Center, launched in 2022 and led by Columbia University in partnership with Florida Atlantic University (FAU), Rutgers University, and Lehman College. CS3 is a pioneering initiative aimed at transforming urban streetscapes into smart, responsive, and inclusive environments through advanced technologies and community-driven design.

MISSION & GOALS

CS3's mission is to advance livable, safe, and inclusive communities by integrating real-time, hyper-local data and intelligent systems into public spaces. The center focuses on five (5) key application areas:

1. Road Safety & Traffic Efficiency
2. Public Safety
3. Assistive Technologies
4. Future of Outdoor Work
5. Hyper-Local Environments

FLORIDA ATLANTIC UNIVERSITY'S ROLE

Florida Atlantic University (FAU) plays a central role in CS3 through its Institute for Sensing and Embedded Network Systems Engineering (I-SENSE) and the College of Engineering and Computer Science. FAU leads the West Palm Beach Mobility Intelligence Project, which laid the groundwork for CS3's local deployment.

KEY CONTRIBUTIONS BY FAU

Smart City Research Leadership: FAU co-leads research in sensing technologies, AI, wireless communication, and urban simulation.

Community Engagement: FAU works closely with West Palm Beach residents and City officials to ensure that smart streetscape solutions reflect local needs and values.

Student Involvement: FAU students are actively engaged in CS3 research, including internships, data analysis, and public outreach.

Privacy-Respecting Technology: FAU emphasizes anonymized data collection and no facial recognition, ensuring ethical and community-trusted deployment.

IMPACT IN WEST PALM BEACH

West Palm Beach is one of CS3's three pilot cities, alongside Harlem (NYC) and New Brunswick (NJ). The CRA district is a focal point for smart streetscape applications, including:

Mobility Pattern Analysis: Understanding pedestrian and vehicle flow to improve safety and efficiency.

Environmental Monitoring: Tracking air quality and noise levels to guide sustainability efforts.

Community Feedback Tools: Empowering residents to shape public space improvements.

Resource Optimization: Using data to reduce waste and improve City services.

BENEFITS TO THE CRA DISTRICT

Enhanced Public Safety through predictive analytics and responsive infrastructure.

Improved Urban Mobility via real-time data insights.

Sustainable Development with smarter resource management.
